

DISTRICT OF CHETWYND

BYLAW NO. 920, 2010

A Bylaw to regulate discharges into the Sanitary Sewer System

WHEREAS Council may, by bylaw, provide for the establishment of a system of sanitary sewer works and regulate the use of the sanitary sewer works of the District;

AND WHEREAS there are compounds in waste that in various concentrations are detrimental to the operation of the sanitary sewer works whose discharge must be regulated.

NOW THEREFORE the Council of The District of Chetwynd, in open meeting assembled, enacts as follows:

1. CITATION

This bylaw may be cited as the “District of Chetwynd Sanitary Sewer Use Bylaw No. 920, 2010.

2. SCOPE

- 2.1. This bylaw regulates the use of the sanitary sewer system within the District of Chetwynd.
- 2.2. The provisions of this bylaw apply to all direct and indirect discharges to any part of the District of Chetwynd sanitary sewer system.
- 2.3. This bylaw regulates the quantity and quality of wastes that may be discharged to the District of Chetwynd sanitary sewer system and the degree of pre-treatment required.
- 2.4. All applicable fees associated with this bylaw are charged in accordance with the District’s current Fees and Charges Bylaw, and all subsequent amendments.
- 2.5. Nothing in this bylaw relieves any person or organization from complying with any provision of any Federal or Provincial legislation or any other bylaw of the District of Chetwynd.

3. DEFINITIONS

- 3.1. In this bylaw, the following words and terms shall have the meanings hereinafter assigned to them:

“**Adverse Effect**” means impairment of or damage to the environment, human health or safety;

“Biosolids” means solids derived from primary, secondary, or advanced treatment of domestic wastewater which have been treated through one or more controlled processes that reduce pathogens, reduce volatile solids or chemically stabilize;

“B.O.D.” or “Biochemical Oxygen Demand” means the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory conditions in five (5) days at 20°C, expressed in milligrams per liter as determined by the appropriate procedure in “Standard Methods”;

“BTEX” means the total of benzene, toluene, ethyl benzene, and xylene;

“Building Sanitary Sewer” means all pipes, conduits, drains and other equipment and facilities owned and maintained by the Owner for the purpose of collecting and transporting waste to the District of Chetwynd sanitary sewer;

“District” means the District of Chetwynd, in the Province of British Columbia;

“C.O.D.” or “Chemical Oxygen Demand” means the measure of the oxygen consuming capacity of organic and inorganic matter present in wastewater as determined by the appropriate procedure described in “Standard Methods”;

“Cooling Water” means untreated water originating from uses such as air conditioning, cooling or refrigeration where the only pollutant added to the water is heat;

“Compatible Pollutant” means B.O.D., S.S., pH and fecal coliform bacteria and such additional pollutants as are now, or may be in the future, specified and controlled in the District of Chetwynd Operational Certificate as issued by the Ministry of Water, Land and Air Protection, for its wastewater treatment works where said works have been designed and used to reduce or remove such pollutants;

“Composite Sample” means a sample which is composed of equal portions of a specified number of Grab Samples collected at the same sampling point at specified time intervals during a specified sampling period.

“Contaminant” means any substance, whether gaseous, liquid or solids, whether dissolved or suspended that:

- (a) injures, or is capable of injuring, the health or safety of a person,
- (b) injures, or is capable of injuring, property or any life form,
- (c) interferes, or is capable of interfering, with the operation of a Sewer or Sewage Facility,
- (d) causes, or is capable of causing, material physical discomfort to a person,
- (e) damages, or is capable of damaging, the environment;

“Domestic Wastewater” means wastewater that is composed of liquid and water carried wastes associated with the use of water for drinking, cooking, cleaning, washing, hygiene, sanitation or other domestic purposes.

“Effluent” means the liquid outflow of any facility designed to treat or convey wastewater.

“Garbage” means solid wastes from domestic and commercial preparation, cooking and dispensing of food, and from handling, storage and sale of food as well as any other refuse not normally associated with typical domestic wastewater.

“Grab Sample” means an aliquot of a sampled stream or discharge collected at one particular place and time.

“High Strength Wastes” means wastewater having;

- (a) B.O.D. in excess of 500 mg/l as analyzed in a twenty-four-hour composite sample, 1000 mg/l as analyzed in a two-hour composite sample, or 2000 mg/l as analyzed in a grab sample or;
- (b) C.O.D. in excess of 750 mg/l as analyzed in a twenty-four-hour composite sample, 1500 mg/l as analyzed in a two-hour composite sample, or 3000 mg/l as analyzed in a grab sample or;
- (c) Suspended Solids (S.S.) in excess of 500 mg/l as analyzed in a twenty-four-hour composite sample, 1000 mg/l as analyzed in a two-hour composite sample, or 2000 mg/l as analyzed in a grab sample.

“Holding Tank” means a device or structure designed for the temporary storage of wastewater.

“Incompatible Pollutant” means any pollutant that is not a compatible pollutant as defined in this section.

“Industrial Wastewater” means wastewater that is composed of liquid and water carried wastes associated with processes employed in industrial manufacturing, trade, or commercial and business establishments, as distinct from domestic wastewater.

“mg/l” or “mg/liter” means milligrams per liter.

“Non Polluted Water” means water that does not contain any compatible pollutants or contaminants such as rainwater, groundwater, swimming pool water or any other non sewage wastewater.

“Oil and Grease” means organic substance including, but not limited to, hydrocarbons, esters, fats, oils, waxes and high molecular weight carboxylic acids.

“Owner” shall have the same meaning as assigned to it under the Community Charter.

“pH” means the logarithm of the reciprocal of the concentration of hydrogen ions in a solution.

“Pesticide” means an organism or material that is represented, sold, used or intended to be used to prevent, destroy, repel or mitigate a pest and includes a plant growth regulator, plant defoliator or plant desiccant and a control product, other than a device that is a control product under the Pest Control Products Act (Canada).

“Plumbing Fixture” means a receptacle, appliance, apparatus or device that discharges wastewater to the sanitary sewer.

“Pool” means any man made structure with a water depth exceeding 450 mm.

“Premises” means any residential, commercial or industrial structure that has a building sanitary sewer connected to the District of Chetwynd Sanitary Sewer System.

“Pretreatment” means application of physical, chemical and/or biological processes to reduce the amount of pollutants in, or alter the nature of the pollutant properties in a wastewater prior to discharging such wastewater to the sanitary sewer.

“Sanitary Sewer” means a Sewer which carries Domestic or Industrial Wastewater but is not intended to carry stormwater, cooling water, groundwater, or unpolluted water.

“Sanitary Sewer System” means all pipes, conduits, drains and other equipment and facilities owned or otherwise under the control of the District for collecting, pumping and transporting wastewater including all such pipes, conduits, drains and other equipment and facilities which connect to those owned or otherwise under the control of the District.

“Septic Tank” means a device or structure in which the solids contained in wastewater are decomposed by anaerobic bacteria and the effluent is disposed of to an infiltration field.

“Sewage Facility” means any works owned by or under the control or jurisdiction of the District that collects, transports, stores, treats, utilizes or discharges wastewater.

“Sewer Connection” means the sanitary sewer or storm sewer connecting pipe from the property line to the sewer.

“Significant User” means any User of the District’s Sanitary Sewer whose flow exceeds 125 m³ per day (27,500 imperial gallons per day) or whose discharge to the sanitary sewer system typically has a strength of 500 mg/l S.S. or 500 mg/l B.O.D.

“Special Waste” means special waste as defined in the Environmental Management Act of British Columbia.

“Special Waste Regulation” means the Hazardous Waste Regulation pursuant to the Environmental Management Act of British Columbia.

“Standard Methods” means the latest edition of Standard Methods for the Examination of Water and Wastewater as published by the American Public Health Association, American Waterworks Association and the Water Environment Federation.

“S.S.” means the solids matter, expressed in mg/l, in a liquid as determined according to Standard Methods.

“Stormwater” means water originating from rainwater, snowmelt or groundwater, including roof drain water.

“Twenty-Four-Hour Composite Sample” means a composite sample consisting of equal portions of 24 grab samples collected at 1 hour intervals.

“Two-Hour Composite Sample” means a composite sample consisting of equal portions of 8 grab samples collected at 15 minute intervals.

“Trucked Waste” means any waste that is collected and transported off site by means of a tank truck and discharged to the sanitary sewer system and includes septic tank waste (septage), holding tank waste and portable toilet waste.

“Unpolluted Water” is water not containing any pollutants limited or prohibited by the water quality standards in effect, or water whose discharge will not cause any violation of receiving water quality standards as established in Federal or Provincial legislation.

“User” means any person who discharges, causes or permits the discharge of wastewater into the District’s Sanitary Sewer system.

“Waste” or “Wastes” means any substance, whether gaseous, liquid or solid, that is discharged or discarded, directly or indirectly to a sanitary sewer or wastewater treatment facility.

“Wastewater” means domestic wastewater or industrial wastewater.

“Wastewater Treatment System” means all facilities and equipment owned or otherwise under the control of the District of Chetwynd to treat domestic and industrial wastewater such that following treatment the effluent is suitable for discharge at the District’s outfall.

4. CONNECTION TO THE SANITARY SEWER

- 4.1. Every sanitary sewer connection shall be installed in accordance with the Districts standards and shall be installed prior to the installation of the building sanitary sewer.
- 4.2. The owner or occupier of any premises upon which a new commercial or industrial facility will be operated and where, on average, it is projected that more than 300m³ of non domestic wastewater will be discharged to the sanitary sewer system in any 30 day period, must obtain a Sewer Use Permit from the District of Chetwynd by completing a Sewer Use Permit Application prior to connection to the sanitary sewer system.

- 4.3. The owner or occupier of any premises upon which an existing commercial or industrial facility is operated and where, on average, more than 300m³ of non domestic wastewater is discharged to the sanitary sewer system in a 30 day period, must obtain a Sewer Use Permit from the District of Chetwynd by completing a Sewer Use Permit Application prior to any alteration or expansion of the facility.
- 4.4. Grease and oil interceptors shall be installed for all food preparation facilities sufficient to prevent the discharge of grease and oil to the sanitary sewer system.
- 4.5. Grease, oil and sand interceptors shall be installed at all vehicle repair and maintenance establishments sufficient to prevent the discharge of grease, oil and sand to the sanitary sewer system.
- 4.6. All interceptors shall be installed upstream of the sanitary sewer system service connection and shall be located so as to be readily accessible for inspection and maintenance.
- 4.7. The owner or occupier of any premises upon which an interceptor is installed shall maintain the interceptor in a serviceable condition at all times.
- 4.8. The District of Chetwynd may, at its sole discretion, request that the owner or occupier of any premises upon which a grease, oil or sand interceptor is installed to provide records of maintenance of the interceptor.

5. MONITORING OF DISCHARGE TO THE SANITARY SEWER SYSTEM

- 5.1. Should it be determined through sampling and analysis that the discharge to the sanitary sewer system from a premises is in violation of this bylaw, the District of Chetwynd may direct the owner or occupier of the premises to take steps to comply with the bylaw and may require the owner or occupier to install monitoring equipment as necessary to demonstrate compliance with this bylaw.
- 5.2. All test, measurements, analysis and examinations of wastewater required to demonstrate compliance with this bylaw shall be at the cost of the owner or occupier of the premises where a discharge occurs.

6. PENALTIES

Any person who violates any provision of this bylaw will be deemed to have committed an offence and shall be liable upon summary conviction to the following penalties:

- (a) a minimum fine of \$500.00;
- (b) a maximum fine of \$10,000;
- (c) in the case of a continuing offense, for each day that the offense continues, either or both of:
 - (i) a minimum fine under Paragraph A, and
 - (ii) a maximum fine under Paragraph B;

- (d) in a prosecution of an offense against a municipal bylaw, the justice or court may impose all or part of the penalties applicable in relation to the offense, together with the costs of prosecution.

7. WASTE DISCHARGE

7.1. Prohibited Wastes

Except as otherwise provided in this bylaw, no person shall release or discharge, or permit the releasing or discharge into the sanitary sewer system of any Prohibited Waste as described in Schedule A.

7.2. Restricted Wastes

Except as otherwise provided in this bylaw, no person shall release or discharge, or permit the releasing or discharge into the sanitary sewer system of any Restricted Waste as described in Schedule B.

7.3. High Strength Wastes

The District may accept High Strength Wastes as defined in this bylaw into the sanitary sewer system at its sole discretion where the wastewater is not such that it can damage the sanitary sewer system or the wastewater treatment system. The District will impose a sewer service surcharge on High Strength Waste.

7.4. Trucked Waste

The District of Chetwynd will accept Trucked Waste from haulers holding a valid District of Chetwynd business license into the sanitary sewer system at the designated discharge location(s) and during the times designated by the District of Chetwynd. The location and times may vary at the discretion of the District of Chetwynd. The District of Chetwynd reserves the right, at its sole discretion, to refuse to accept any load of trucked waste that it considers to be of questionable origin or quality.

The discharge of trucked waste to the sanitary sewer system at any location(s) other than those authorized by the District of Chetwynd are strictly prohibited and are subject to the penalties contained in this bylaw.

A properly completed load manifest for every load of trucked waste discharged to the District of Chetwynd sanitary sewer must be provided to the District of Chetwynd or its designated representative by the trucked waste hauler prior to discharge to the sanitary sewer. Failure to provide a properly completed load manifest will result in the refusal to accept the load of trucked waste. Load manifests to be deposited at the transfer station.

Only trucked waste originating in the Peace River Regional District will be accepted.

Waste from commercial oil and grease separators and commercial car wash catch basins will not be accepted into the sanitary sewer.

In addition to the penalties described in this bylaw, the District of Chetwynd may, at its sole discretion, suspend or revoke access to the designated discharge location should a trucked waste hauler be found in violation of any of the provisions of this bylaw.

7.5. Non Polluted Water

No person shall release or discharge, or permit the releasing or discharge into the sanitary sewer system any non polluted water.

7.6. Pretreatment Requirements

Where wastewater discharged into the sanitary sewer collection system is found to have been deleterious to the sanitary sewer collection system or wastewater treatment plant, the District of Chetwynd may, by notice in writing to the owner or occupier of any premises:

- (a) Refuse to allow any additional wastes to be discharged to the sanitary sewer system;
- (b) Require the owner or occupier of any premises to construct, operate and maintain wastewater pre-treatment facilities to ensure compliance with this bylaw;
- (c) Require the owner or occupier of any premises to construct, operate and maintain facilities to control the rate of discharge to the sanitary sewer system;
- (d) Require the owner or occupier to pay additional charges to cover the added cost of treating the wastes discharged to the sanitary sewer system as contained in the District's current Fees and Charges Bylaw, and all subsequent amendments.

BYLAW NO. 920, 2010**

SCHEDULE “A”

PROHIBITED WASTE

The following are designated as Prohibited Waste:

1. Any material which causes or will cause an adverse effect.
2. Any stormwater or unpolluted water.
3. Any flammable or explosive material.
4. Any pesticides, insecticides, herbicides, or fungicides save and except chemicals contained in stormwater emanating from trees or vegetation treated in accordance with the Pesticide Control Act.
5. Any material capable of obstructing wastewater flow or interfering with the operation of any part of the sewage collection or treatment system. These materials include, but are not limited to, ashes, cinders, sand, mud, straw, grass clippings, insoluble shavings, metal, glass, rags, feathers, tar, asphalt, creosote, plastics, wood, animal paunch contents, offal, blood, bones, meat trimmings and waste, fish or fowl head, shrimp, crab or clam shells, fish scales, entrails, lard, mushrooms, tallow, baking dough, chemical residues, cannery or wine waste, bulk solids, hair and fleshings, spent grain and hops, whole or ground food or beverage containers, garbage, paint residues, cat box litter, slurries of concrete, cement, lime or mortar.
6. Any material, other than domestic wastewater, which by itself or in combination with another substance is capable of creating odours related to but not limited to hydrogen sulfide, carbon disulfide, other reduced sulfur compounds, amines or ammonia outside or in and around the wastewater collection system.
7. Any noxious or malodorous material which by itself or in combination with another material is capable of creating a public nuisance or hazard to life or may prevent entry into a sewer or pump station for its maintenance or repair.
8. Any material with corrosive properties which by itself or in combination with another material may cause damage to any part of the sewage collection or wastewater treatment system.
9. Any infectious material which by itself or in combination with another material may create a contaminant in any part of the sewage collection or wastewater treatment system.

10. Grit removed from commercial or industrial premises including but not limited to grit removed from car washing establishments, automobile garages, restaurant sumps or interceptors.
11. Any material classified as a Special Waste as defined by the Ministry of Environment.
12. Any material that may cause biosolids from the Water Reclamation Plant to fail to meet the criteria outlined in the British Columbia Organic Matter Recycling Regulation for any end use that the District may choose to undertake at any given time.
13. Any material containing Pharmaceuticals.

BYLAW NO. 920, 2010**

SCHEDULE “B”

RESTRICTED WASTE

The following are designated as Restricted Waste:

1. Any wastewater having a B.O.D. in excess of 500 mg/l as analyzed in a twenty-four hour composite sample, 1000 mg/l as analyzed in a two-hour composite sample, or 2000 mg/l as analyzed in a grab sample.
2. Any wastewater having a C.O.D. in excess of 750 mg/l as analyzed in a twenty-four hour composite sample, 1500 mg/l as analyzed in a two-hour composite sample, or 3000 mg/l as analyzed in a grab sample.
3. Any wastewater having a S.S. in excess of 500 mg/l as analyzed in a twenty-four-hour composite sample, 1000 mg/l as analyzed in a two-hour composite sample, or 2000 mg/l as analyzed in a grab sample.
4. Any wastewater which contains oil and grease in a concentration that is in excess of 100 mg/l as analyzed in a twenty-four-hour composite sample, 200 mg/l as analyzed in a two-hour composite sample, or 400 mg/l as analyzed in a grab sample.
5. Any wastewater which contains oil and grease derived from a petroleum source in a concentration that is in excess of 15 mg/l as analyzed in a twenty-four-hour composite sample, 30 mg/l as analyzed in a two-hour composite sample, or 60 mg/l as analyzed in a grab sample.
6. Any material which may solidify or become viscous at temperatures above 0°C.
7. Any wastewater having a temperature greater than 65° C.
8. Any wastewater having a pH lower than 5.0 or higher than 11.0 as determined by a grab sample, or less than 5.5 or higher than 10.5 as determined by a two-hour composite sample.
9. Any wastes from the preparation, cooking and dispensing of food that has not been properly comminuted to 12mm or less in any dimension. Such waste must be shredded to such a degree that all particles will be freely carried under the flow conditions prevailing in the sanitary sewer collection system.
10. Any wastewater containing a hazardous, toxic or poisonous substance in sufficient quantity to injure or interfere with any sanitary sewer system or wastewater treatment system which could constitute a hazard to humans or animals, or create a hazard in areas receiving treated effluent from the wastewater treatment plant.

11. Any wastewater containing dyes or colouring material which passes through the sanitary sewer or wastewater treatment system and discolours any part of the sanitary sewer or wastewater treatment system or the treated effluent from the wastewater treatment plant.
12. Any wastewater containing substances in concentrations that are not amenable to treatment or reduction in the wastewater treatment process being employed by the District at any given time or that cannot be treated to such a degree during the normal wastewater treatment process to meet the requirements of the District of Chetwynd's Ministry of Water, Land and air Protection Operational Certificate or any other applicable provincial or federal legislation that may be in effect.
13. Any wastewater with a concentration, in a combined or uncombined form, in excess of the levels set out below:

Substance	Expressed As	Concentration in mg/l		
		A	B	C
Aluminum	Al	50	100	200
Arsenic	As	1	2	4
Boron	B	50	100	200
Cadmium	Cd	0.2	0.4	0.8
Chromium	Cr	4	8	16
Cobalt	Co	5	10	20
Copper	Cu	2	4	8
Cyanide	Cn	1	2	4
Iron	Fe	10	20	40
Lead	Pb	1	2	4
Maganese	Mn	5	10	20
Mercury	Hg	0.05	0.1	0.2
Molybdenum	Mo	1	2	4
Phenols		1	2	4
Phosphorus	P	12.5	25	50
Silver	Ag	1	2	4
Sulphate	SO ₄	1500	3000	6000
Sulphide	S	1	2	4
Tin	Sn	5	10	20
Zinc	Zn	3	6	12
A:	24 hour composite sample			
B:	2 hour composite sample			
C:	Grab sample			

14. Any wastewater which contains additional water added solely for the purpose of diluting waste which would otherwise exceed the applicable maximum concentrations.

SCHEDULE “C”

SEWAGE DUMPING AGREEMENT

BETWEEN:

DISTRICT OF CHETWYND

A municipal authority incorporated under
the laws of the Province of British Columbia.

(hereinafter referred to as the “District”)

AND:

(hereinafter referred to as the “Carrier”)

1. The District of Chetwynd and the Carrier agree as follows:
 - (a) Dumping to take place at designated area at Nicholson Road Sewer Dump.
 - (b) Dumping areas are to be kept clean and tidy at all times.
 - (c) Dumping of domestic wastewater only will be permitted.
 - (d) Anyone desirous of dumping industrial wastewater must be able to verify (tests done by and independent laboratory) that it contains no hazardous waste as defined by The District Sanitary Use Bylaw in effect at the time of dumping. The District shall be in possession of these test results **before** dumping can take place.
 - (e) Anyone found abusing the privilege of using these sites will be denied access without notice.
 - (f) Tanks used for the hauling of wastewater shall be used for domestic wastewater only and shall not contain any material or residue that may be considered harmful to the integrity of the wastewater system, a grab sample may be taken to ensure there is no contaminated waste. If contamination is found in any load, the carrier shall be responsible for all costs related to the clean up and site repairs. If a driver refuses to allow the Attendant to take a sample, further access will be denied.
 - (g) Trucked waste shall be deposited by gravity only.

2. This Agreement will commence on _____ and will expire on _____
(month/day/year)

(month/day/year)

2. The representative of the parties for this Agreement as designated by The District of Chetwynd are:

For the District of Chetwynd: Director of Engineering & Public Works (or designate)

For the Carrier: _____

3. This Agreement incorporates the terms and conditions set out in Schedule A attached.

4. The parties have signed this Agreement on this _____ day of _____, 20__.

Signed in the presence of:

District of Chetwynd

Witness Signature

Signature

Signed in the presence of:

Carrier

Witness Signature

Signature

TERMS AND CONDITIONS OF AGREEMENT

1. The services of the Carrier shall be performed to the specifications and satisfaction of the District of Chetwynd.
2. This Agreement shall not come into effect until signed by both parties.
3. Failure to fulfill the conditions of this Agreement shall entitle The District of Chetwynd to terminate this Agreement without notice.
4. The Carrier is an independent contractor and shall not for any purpose be a servant, employee or agent of The District of Chetwynd.
5. The District of Chetwynd may in his/her sole discretion delegate any duties, powers and functions relating to the provisions of this Agreement to any employee or agent of the District of Chetwynd.
6. This Agreement shall not be assigned without first obtaining the written consent of the District of Chetwynd.
7. The Carrier shall comply with:
 - (a) Any Act of the Legislature of the Province and of the Parliament of Canada now in force or enacted after this time and any regulations enforced from time to time under such Acts that applies to the Carrier in respect of this Agreement; and,
 - (b) The District of Chetwynd Sanitary Use Bylaw
8. The Carrier acknowledges its responsibility either as a principal contractor, an employer or worker as defined in the Occupational Health and Safety Act, and that it will, as a condition of this Agreement, comply with the Occupational Health and Safety Act and the regulations thereto.
9. It is agreed that this written document contains the entire Agreement of the parties in regard to the matters dealt with and that no understandings or Agreements, verbal or otherwise, exist between the parties except as expressly set out.
10. The validity and interpretation of this Agreement of each clause or part is to be governed by the laws of the Province of British Columbia.
11. The District of Chetwynd reserves the right to cancel this agreement at anytime due to operational requirements.
